

NyDock

Floating Dock Systems and Pontoons

DISCOVER THE DIFFERENCE

Escape from the hustle & bustle of life. Spend time by the water – it's a place to build memories with family and friends.

As you build your new dock system or expand your current one, consider a floating dock system. Floating docks are easy to install and maintain and will last a lifetime

NyDock, Pipefusion's floating dock systems, are unique because they are made of high density polyethylene (HDPE) pipe.

Essentials

At the heart of every NyDock system are pontoons made from the same tough, durable, HDPE pipe used in mining, municipal and industrial applications.

NyDock floating dock system as part of the Town of Huntsville's walking trail

The ends of each pontoon are capped with a unique fusion welding process that creates a joint that becomes stronger than the pipe itself. HDPE deck connection brackets are also fusion welded along the pontoon length to maximize the dock strength

Every NyDock pontoon is durable and puncture resistant. It will not rust, rot, or corrode and will not leach contaminants into the water. NyDock pontoons are environmentally friendly!

Multipurpose

Have you ever wanted a swimming platform, pontoon boat, and dock, but could only choose one? NyDock floating docks can be used in one or all of these configurations.

Want a swimming raft? Simply disconnect your dock from shore and tow it to your favorite swimming spot. Want a pontoon boat for fishing? Add a transom and you can fish anywhere on your lake – from the comfort of your own Muskoka chair!

The transom option turns any NyDock pontoon dock into a pontoon boat

Install It & Forget About It

NyDocks are typically not affected by winter ice. The unique design of the pontoon resists the crushing action of ice that destroys many other docking systems.

With NyDock there's no long, complicated process of dock removal every fall. Gone is the complex set of gears and pulleys to hoist the dock out of the water, only to hang in the air as an eyesore all winter long.

A NyDock floating dock is simply disconnected from the access ramp and tied back to shore for the winter. The weights are left connected to the main dock and everything remains in place. The dismantling process takes about 5 minutes.

WHAT'S IN A NYDOCK?

Experience

Pipefusion has been joining HDPE pipe for over 25 years in high risk mining,

industrial, and municipal applications – care is critical. We use the same care, propriety knowledge and equipment

from our pipe business to produce the unique NyDock docking systems.

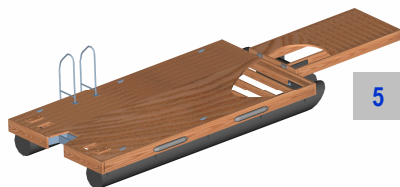

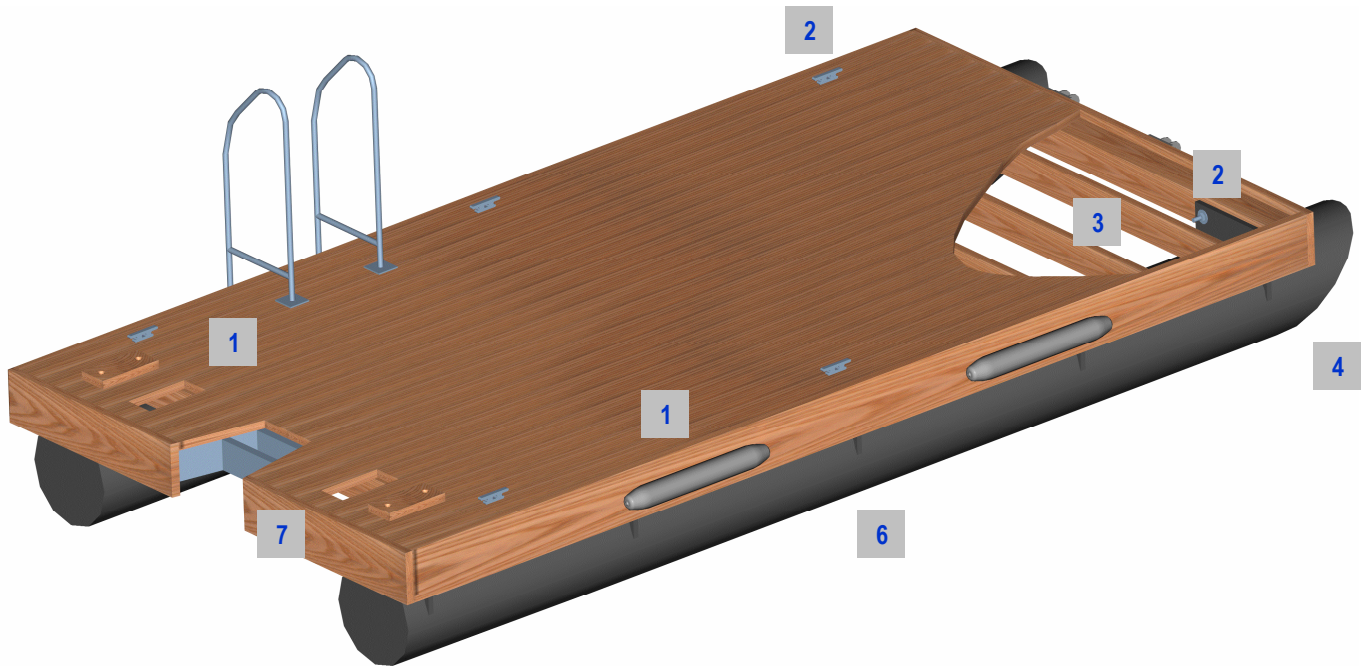

1 Accessories include a transom, swimming ladder and bumpers.

2 Galvanized hardware is used throughout including deck screws, frame nuts, bolts, and washers and ramp hinges.

3 All NyDock decks and frames are made from pressure treated 2"x6" and 2"x10" lumber.

4 Tapered pontoons are available for pontoon boats.

5 A floating access ramp can be used to connect the NyDock to shore.

6 At the heart of every NyDock is Polyethylene pipe and brackets.

7 Anchor connection access.

NYDOCK OPTIONS

The Complete Solution

A NyDock system is a floating platform built for you - complete with pontoons, your choice of decking and cleats. You can add accessories such as bumpers, a swimming ladder, or a floating access ramp. You can even add a transom so that you can make your NyDock into a pontoon boat!

NyDock floating dock and access ramp

Do-it-Yourself

For the do-it-yourselfer, a NyDock kit is available. The NyDock kit includes everything but the decking. All that you have to do is assemble it - a perfect summertime project!

NyDock pontoons ready for installation

NyDock Standard Sizes

NyDock floating docks and ramps come in the following standard width and length combinations.

Custom Floating Dock Systems

Other floating dock sizes and configurations are available.

We have extensive experience building large and small floating dock systems. Please visit us at Pipefusion Services to view our selection of floating docks and pontoons. The possibilities are endless - the only limit is your imagination!
